Benefits:

Provide your client beauty inside and out. The 22% Carbamide Peroxide gel is based on a tested and true formulation made in U.S. Grade quality ingredients. No harsh chemicals to harm the tooth enamel or sensitivity to the gums. Nothing imported. FDA is no longer allowing imported gels from overseas. The gel is water based, cutting the glycerin content in half to help hydrate the teeth during the whitening process. Our blue LED lights mouthpiece activates the gel to perform more quickly than trays or gel strips alone. Thirty minutes is all it takes to have beautiful white teeth that appears luminescent and polished. The professional treatment can be repeated every 3-6 months.

Before

After
